

ETC38

12V Top Terminal Battery Cabinet

Features:

- Ships fully assembled and wired for easy installation.
- UL 1778 listed and fully tested at the factory prior to shipping.
- Removable hinged doors for easy battery access.
- Locking doors provide access security.
- Easy maintenance design allows access to batteries from all sides of the cabinet.
- Batteries secured with non-conductive strapping for safe transit.
- DC Circuit Breakers up to 600A available. Breaker options include: Shunt trips, auxiliary contacts and under voltage releases.
- Powder coated with corrosion resistant powder in fully automated line, using a 7 stage pre-treatment process.
- Front and rear access for standard pallet jack.
- NFPA 70 models- available.
- Seismically certified to IBC (2012), ASCE 7-10, and CBC (2010) codes. Design meets default Seismic Category Design D ($S_s=2.9$), Importance Factor 1.5, and horizontal static acceleration of .817g

Options:

- Additional Booster Chargers available for faster recharge of batteries.
- Spill containment systems options are available.
- Remote Battery Monitoring options are available.
- Custom colors are available to match existing equipment.
- External Breaker Handle available for added safety during maintenance.

**SEISMIC
CERTIFIED**
